

JACKSON COUNTY DETENTION CENTER

FACT SHEET
Q1 2024

JUSTICE WITH DIGNITY

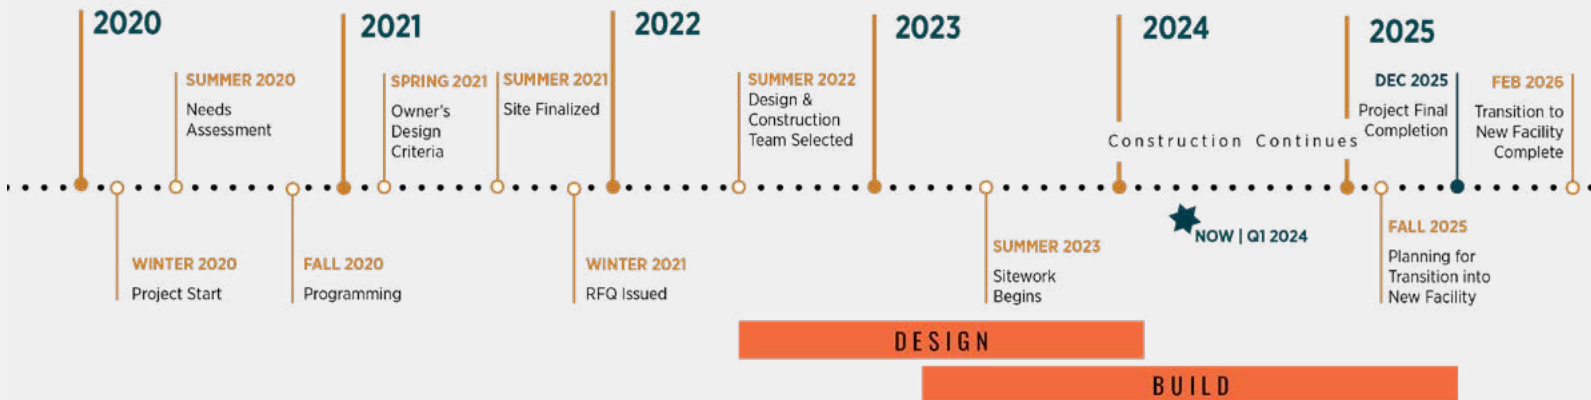

In order to provide for the public safety of the citizens of Jackson County, it is sometimes necessary to detain and house those who may harm themselves or others in the County Detention Center. Most of these individuals are awaiting trial, sentencing, or, if sentenced, incarceration at state institutions.

Jackson County will meet the community's needs by planning and building a detention center that is safe, secure, efficient to operate, and incorporates thoughtfully designed long-term solutions for the Jackson County Justice System.

One of the key elements of planning, building, and operating a detention center, is respecting the dignity of detained individuals. To accomplish this, the facility will provide evidence-based treatment and training opportunities that address the needs of the individual and the underlying causes of criminal behavior.

BUDGET AND TIMELINE UPDATE

The Jackson County Legislature recently approved the Components Package that includes the footings, foundation, building under slab, site utilities, structure and skin. Together, these components comprise roughly 95% of the overall budget, and advance the project to vertical construction. A vote on the final component package including interior finishes will take place in the Spring 2024. Completion is scheduled for December 2025, with operations in the facility beginning February 2026.

CONSTRUCTION STATUS

The cell module is a fundamental component of the new detention facility that will be used repetitively. Recently, precast module mockups were carefully examined to ensure quality standards are met and to mitigate potential conflicts or problems up front, ensuring project success.

Precast Cell
Module Mockups

Building pad settlement and surcharge removal is now complete. The efforts on site have transitioned to the placement of structural footings and foundations along with underground utilities. The project team has coordinated with both public and private providers for services to the facility. Inspections and testing are ongoing to safeguard the County.

Conduit Placement

WORKFORCE SPOTLIGHT

The Jackson County Detention Center project has committed to a workforce utilization goal of 35% combined minority and women. To assist with reaching this goal, JE Dunn Construction has engaged Miss GG Owens to have a presence throughout the community as well as the construction site to attract and acquire talent. Currently, the project is projected to meet or exceed the 35% workforce goals, furthering the project's commitment to underutilized or disadvantaged small businesses.

Miss GG Owens, Workforce Coordinator
